

LIBRARY COOPERATION & NETWORKING: RESOURCE SHARING

By

Swapan Kr. Dasgupta*

ABSTRACT

In recent years, the communications revolution has been responsible for and is the prime mover of much of human advancement. Information technology has been inspired and propelled by the electronics revolution. The present paper attempts to bring into focus, the utility of resource sharing with the use of Information technology, and thus updating the library through networking. The latest technology will help in crossing the hurdles with limited man power.
