

DEVELOPING GATEWAYS OF KNOWLEDGE RESOURCES AND MANAGEMENT USING INNOVATIVE TECHNOLOGIES

By

Dr. V. Venkata Ramana*
N. Varatha Rajan**

ABSTRACT

Globalization of Information, the emergence of Information economics and the growth of Internet and other global communications, networks and Web have recast the role of Information Organization and Management. Institutions have been embracing technology to design their Information storage, retrieval channels and dissemination to harness global Information resources. The Internet became an indispensable tool for new models, new information processes and new ways of distributing knowledge.
