ABSTRACT

The development of computers and communication technology has brought radical changes in the modes and methods of information, storage retrieval and transmission. The advent of Internet has created a greater impact on the Library & Information Centres to have access to various information sources and disseminate it to its users. The services available on Internet can be utilized by the Library & Information Centres for acquisition, collection development and various services like CAS, SDI, ILL, Reference service etc. through the various types of resources that are available on Internet. The article lists the various databases, websites available for utilization in Library & Information Centres.
