Acknowledgements

Completion of this study would not have been possible without the Grace of Almighty God. I would like to express my special gratitude to my external supervisor, Dr. Prem Lall Sankhayan, for his professional guidance and parental encouragement in the planning and execution of the study. His expertise in mathematical modelling of economic and biological problems remained the motivating force since the inception of research idea and through the model development and analysis stage. I feel short of words for his effective teachings, guidance and always motivating me to think and write scientifically. I am indebted to his family members for their support and encouragement. I am equally thankful to my internal supervisor, Dr. Ranveer Singh who always kept his doors open for questions and discussions. His easy accessibility, morale boosting approach and vast research experience in the mountain farming system helped in timely progress in all the stages of research work.

This study was partially funded by the Integrated Institute of Himalayan Studies Shimla and the Department of Ecology and Natural Resource Management, Norwegian University of Life Sciences, Aas. I am very thankful to these two institutions for their immense help and encouragement without which it would have been really a very difficult task.

I would like to thank the Department of Education, Government of Himachal Pradesh, for granting study leave for two years that enabled me to complete the task in stipulated time. I would also like to thank University Grants Commission of India (UGC) for providing travel grant to attend tenth biennial conference of ISEE at UNEP, Nairobi to present the fourth research article of this thesis.

Grateful thanks are also due to Prof. Ole Hofstad, the Department of Ecology and Natural Resource management, University of Life Sciences, Norway, for his valuable and professional advice especially while developing the second article of this thesis. I gratefully acknowledge the valuable suggestions and
continuous encouragement provided by Dr. C. S. Vaidya, Dr. N.S. Bist, Dr. Manoj Jreat, Mr. Ajay Khurana, Dr. Vinay Mohan Sharma and Mr. Devender Pirta during the course of this work. Mr. Suresh Kumar and Mr. Sayyad Mubashir also deserve special thanks for helping me in data collection during the field surveys.

A special word of thanks is due to the people of Chabri watershed especially Mr. Babu Ram Verma of Mahog village for facilitating our field survey. I cannot forget to thank some government officials namely, Mr. L.R. Sharma, ARO in Directorate of Land Records Shimla, Mr. Gopal, HDM in SCSTE Shimla, Mr. Krishan Singh, B.O. in Forest Range Office Chail and Mr. Prakash Chand, Village Revenue Officer, Chail for their help in providing necessary information.

I am very grateful to my parents for empowering me to reach this level and my father-in-law, Mr. S. R. Khajuria, for providing invaluable help to ensure timely processing of many official procedures during the period of study. My special thanks to my wife, Deepa and 4 year old daughter, Avatansha, for their continuous support, love, encouragement and patience during this study, especially when I had to stay away from them in the study area, Norway and Nairobi. Finally, I would also like to put on record my appreciation to all the members of my extended family for their support, co-operation, encouragement and tolerating my absence from active socialisation.

Rakesh Kumar Sharma
