ACKNOWLEDGEMENT

First of all I pay all my homage and designate my emotions to the lord Shree Nageswar whose blessings promote me to accomplish this interesting task. This task requires effort from many people without them it would not have been completed.

I bow my head in utter humility and complete dedication. It is with great pleasure and with deep sense of gratitude, to my esteemed Friend, childhood colleague, sister, guide and assistant professor DR. KIRAN S.NIMAVAT, Assistant professor of Government science college, Gandhinagar, who has inspired me with keen interest and ever vigilant guidance without which this task could not have been achieved. She has not only guided me but also acted as a co-traveler throughout my research work. It is the result of his unfailing efforts and meticulous training that today I have reached my destination. The only way to thank her would perhaps to strive to work similarly in years ahead, and continue the chain in succession.

I gratified Dr. Monalisa Boruah, Research coordinator, Department of Chemistry, JJT University, for their cooperation as I have been constantly benefited with her lofty research methodology and the motivation as well as their highly punctual affectionate.
