List of Figures

Fig. 1.1. Processes involved in the exchange of PAHs across the soil-air interface: Air-soil interface Review (Adopted from Cousins et al., 1999)

Fig. 3.1. Map of India showing Delhi and location map of the sampling sites in Delhi

Fig. 3.2. Flowchart summarizing the major steps of BC determination method

Fig. 4.1.1. Seasonal variation of total PAH concentration (µg kg\(^{-1}\)) in different fractions of background site

Fig. 4.1.2. Seasonal variation of individual PAHs in Fraction B

Fig. 4.1.3. Seasonal variation of individual PAHs in Fraction 1

Fig. 4.1.4. Seasonal variation of individual PAHs in Fraction 2

Fig. 4.1.5. Seasonal variation of individual PAHs in Fraction 3

Fig. 4.1.6. Seasonal variation of individual PAHs in Fraction 4

Fig. 4.1.7. Percentage contribution of different fractions to total PAHs in monsoon season

Fig. 4.1.8. Percentage contribution of different fractions to total PAHs in winter season

Fig. 4.1.9. Percentage contribution of different fractions to total PAHs in summer season

Fig. 4.1.10. Percentage contribution of different fractions to total PAHs (annual average)

Fig. 4.1.11. Individual PAHs (annual average) in different fractions

Fig. 4.1.12. Percentage contribution of 2, 3, 4 and 5-ring PAHs in different fractions of background soil

Fig. 4.1.13. Ring wise percentage distribution of total PAHs (annual average)

Fig. 4.1.14. Graph showing average carcinogenic PAH concentration (µg kg\(^{-1}\)) and associated total B(a)Peq concentrations (µg kg\(^{-1}\)) in different fractions of background site

Fig. 4.1.15. Percentage distribution of individual carcinogenic PAHs

Fig. 4.1.16. Percentage distribution of carcinogenic and non-carcinogenic PAHs

Fig. 4.1.17. Seasonal variation of BC concentration (mg g\(^{-1}\)) in different fractions of background site.

Fig. 4.1.18. Percentage distribution of BC concentration in different soil fractions
Fig. 4.1.19. Seasonal variation of TOC concentration (mg g\(^{-1}\)) in different fractions of background site

Fig. 4.1.20. Percentage distribution of TOC concentration in different soil fractions

Fig. 4.1.21. Linear Regression plots showing PAH/BC relationship

Fig. 4.1.22. Linear Regression plots showing PAH/TOC relationship

Fig. 4.1.23. Linear Regression plots showing BC/TOC relationship

Fig. 4.1.24. Graphical representation of Principal Component Analysis results of background site

Fig. 4.2.1. Seasonal variation of total PAH concentration (\(\mu g\) kg\(^{-1}\)) in different fractions of industrial site

Fig. 4.2.2. Seasonal variation of individual PAHs in Fraction B

Fig. 4.2.3. Seasonal variation of individual PAHs in Fraction 1

Fig. 4.2.4. Seasonal variation of individual PAHs in Fraction 2

Fig. 4.2.5. Seasonal variation of individual PAHs in Fraction 3

Fig. 4.2.6. Seasonal variation of individual PAHs in Fraction 4

Fig. 4.2.7. Percentage contribution of different fractions to total PAHs in monsoon season

Fig. 4.2.8. Percentage contribution of different fractions to total PAHs in winter season

Fig. 4.2.9. Percentage contribution of different fractions to total PAHs in summer season

Fig. 4.2.10. Percentage contribution of different fractions to total PAHs (annual average)

Fig. 4.2.11. Individual PAHs (annual average) in different fractions

Fig. 4.2.12. Percentage contribution of 2, 3, 4, 5 and 6-ring PAHs in different fractions of industrial soil

Fig. 4.2.13. Ring wise percentage distribution of total PAHs (annual average)

Fig. 4.2.14. Graph showing average carcinogenic PAH concentration (\(\mu g\) kg\(^{-1}\)) and associated total B(a)P_{eq} concentration (\(\mu g\) kg\(^{-1}\)) in different fractions of industrial site

Fig. 4.2.15. Percentage distribution of carcinogenic PAHs and non-carcinogenic PAH

Fig. 4.2.16. Percentage distribution of individual carcinogenic PAHs

Fig. 4.2.17. Seasonal variation of BC concentration (mg g\(^{-1}\)) in different fractions of industrial site
Fig. 4.2.18. Percentage distribution of BC in different fractions

Fig. 4.2.19. Seasonal variation of TOC concentration (mg g⁻¹) in different fractions of industrial site

Fig. 4.2.20. Percentage distribution of TOC in different fractions

Fig. 4.2.21. Linear Regression plots showing PAH/BC relationship

Fig. 4.2.22. Linear Regression plots showing PAH/TOC relationship

Fig. 4.2.23. Linear Regression plots showing BC/TOC relationship

4.2.24. Graphical representation of Principal Component analysis of the industrial site

Fig. 4.3.1. Seasonal variation of total PAH concentration (µg kg⁻¹) in different fractions of urban site

Fig. 4.3.2. Seasonal variation of individual PAHs in Fraction B

Fig. 4.3.3. Seasonal variation of individual PAHs in Fraction 1

Fig. 4.3.4. Seasonal variation of individual PAHs in Fraction 2

Fig. 4.3.5. Seasonal variation of individual PAHs in Fraction 3

Fig. 4.3.6. Seasonal variation of individual PAHs in Fraction 4

Fig. 4.3.7. Percentage contribution of different fractions to total PAHs in monsoon season

Fig. 4.3.8. Percentage contribution of different fractions to total PAHs in winter season

Fig. 4.3.9. Percentage contribution of different fractions to total PAHs in summer season

Fig. 4.3.10. Percentage contribution of different fractions to total PAHs (annual average)

Fig. 4.3.11. Individual PAHs (annual average) in different fractions

Fig. 4.3.12. Percentage composition of 2, 3, 4, 5 and 6-ring PAHs in different fractions of urban soil

Fig. 4.3.13. Ring wise percentage distribution of total PAHs (annual average)

Fig. 4.3.14. Graph showing average carcinogenic PAH concentration (µg kg⁻¹) and associated total B(a)P_eq concentrations (µg kg⁻¹) in different fractions of urban site

Fig. 4.3.15. Percentage distribution of carcinogenic PAHs and non- carcinogenic PAHs

Fig. 4.3.16. Percentage distribution of individual carcinogenic PAHs (annual average)
Fig. 4.3.17. Seasonal variation of BC concentration (mg g\(^{-1}\)) in different fractions of urban site.

Fig. 4.3.18. Percentage distribution of BC concentration in different soil fractions (annual average)

Fig. 4.3.19. Seasonal variation of TOC concentration (mg g\(^{-1}\)) in different fractions of urban site

Fig. 4.3.20. Percentage distribution of TOC concentration in different soil fractions (annual average)

Fig. 4.3.21. Linear Regression plots showing PAH/BC relationship

Fig. 4.3.22. Linear Regression plots showing PAH/TOC relationship

Fig. 4.3.23. Linear Regression plots showing BC/TOC relationship

Fig. 4.3.24. Graphical representation of Principal Component Analysis results of urban site

Fig. 4.4.1. Seasonal variation of total PAH concentration (in \(\mu g \ kg^{-1}\)) in different fractions of suburban site

Fig. 4.4.2. Seasonal variation of individual PAHs in Fraction B

Fig. 4.4.3. Seasonal variation of individual PAHs in Fraction 1

Fig. 4.4.4. Seasonal variation of individual PAHs in Fraction 2

Fig. 4.4.5. Seasonal variation of individual PAHs in Fraction 3

Fig. 4.4.6. Seasonal variation of individual PAHs in Fraction 4

Fig. 4.4.7. Percentage contribution of different fractions to total PAHs in monsoon season

Fig. 4.4.8. Percentage contribution of different fractions to total PAHs in winter season

Fig. 4.4.9. Percentage contribution of different fractions to total PAHs in summer season

Fig. 4.4.10. Percentage distribution of total PAHs in different fractions (annual average)

Fig. 4.4.11. Individual PAHs (annual average) in different fractions

Fig. 4.4.12. Percentage composition of 2, 3, 4, 5 and 6-ring PAHs in different fractions of urban soil

Fig. 4.4.13. Ring wise percentage distribution of total PAHs (annual average)

Fig. 4.4.14. Graph showing average carcinogenic PAH concentration (\(\mu g \ kg^{-1}\)) and associated total B(a)P\(_{eq}\) concentrations (\(\mu g \ kg^{-1}\)) in different fractions of suburban site
Fig. 4.4.15. Percentage distribution of carcinogenic and non-carcinogenic PAHs

Fig. 4.4.16. Percentage distribution of individual carcinogenic PAHs

Fig. 4.4.17. Seasonal variation of BC concentration (mg g⁻¹) in different fractions of suburban site

Fig. 4.4.18. Percentage distribution of BC concentration in different soil fractions

Fig. 4.4.19. Seasonal variation of TOC concentration (mg g⁻¹) in different fractions of suburban site

Fig. 4.4.20. Percentage distribution of TOC concentration in different soil fractions

Fig. 4.4.21. Linear Regression plots showing PAH/BC relationship

Fig. 4.4.22. Linear Regression plots showing PAH/TOC relationship

Fig. 4.4.23. Linear Regression plots showing BC/TOC relationship

Fig. 4.4.24. Graphical representation of Principal Component Analysis results of the suburban site

Fig. 4.5.1. Seasonal variation of total PAH concentration (µg kg⁻¹) in different fractions of rural site

Fig. 4.5.2. Seasonal variation of individual PAHs in Fraction B

Fig. 4.5.3. Seasonal variation of individual PAHs in Fraction 1

Fig. 4.5.4. Seasonal variation of individual PAHs in Fraction 2

Fig. 4.5.5. Seasonal variation of individual PAHs in Fraction 3

Fig. 4.5.6. Seasonal variation of individual PAHs in Fraction 4

Fig. 4.5.7. Percentage contribution of different fractions to total PAHs in monsoon season

Fig. 4.5.8. Percentage contribution of different fractions to total PAHs in winter season

Fig. 4.5.9. Percentage contribution of different fractions to total PAHs in summer season

Fig. 4.5.10. Percentage contribution of different fractions to total PAHs (annual average)

Fig. 4.5.11. Individual PAHs (annual average) in different fractions

Fig. 4.5.12. Percentage composition of 2, 3, 4, 5 and 6-ring PAHs in different fractions of rural soil

Fig. 4.5.13. Ring wise percentage distribution of total PAHs (annual average)
Fig. 4.5.14. Graph showing average carcinogenic PAH concentration (μg kg\(^{-1}\)) and associated total B(a)P\(_{eq}\) concentrations (μg kg\(^{-1}\)) in different fractions of rural site

Fig. 4.5.15. Percentage distribution of carcinogenic and non-carcinogenic PAHs

Fig. 4.5.16. Percentage distribution of individual carcinogenic PAHs

Fig. 4.5.17. Seasonal variation of BC concentration (in mg g\(^{-1}\)) in different fractions of rural site

Fig. 4.5.18. Percentage distribution of BC concentration in different soil fractions

Fig. 4.5.19. Seasonal variation of TOC concentration (mg g\(^{-1}\)) in different fractions of rural site

Fig. 4.5.20. Percentage distribution of TOC concentration in different soil fractions

Fig. 4.5.21. Linear Regression plots showing PAH/BC relationship

Fig. 4.5.22. Linear Regression plots showing PAH/TOC relationship

Fig. 4.5.23. Linear Regression plots showing BC/TOC relationship

Fig. 4.5.24. Graphical representation of Principal Component Analysis results of the rural site

Fig. 4.6.1. Spatial distribution of PAHs in Fraction B

Fig. 4.6.2. Spatial distribution of PAHs in Fraction 1

Fig. 4.6.3. Spatial distribution of PAHs in Fraction 2

Fig. 4.6.4. Spatial distribution of PAHs in Fraction 3

Fig. 4.6.5. Spatial distribution of PAHs in Fraction 4

Fig. 4.6.6. PAH distribution in different fractions of Delhi soils

Fig. 4.6.7. Spatial distribution of total PAHs in Delhi soils

Fig. 4.6.8. Individual PAH distribution in Delhi soils

Fig. 4.6.9. Percentage distribution of 2-, 3-, 4-, 5- and 6-ring PAHs in different sampling sites of Delhi

Fig. 4.6.10. Ring wise percentage distribution of total PAHs in Delhi soils

Fig. 4.6.11. Box Plots of individual PAH compounds in Delhi soils

Fig. 4.6.12. Graphical representation of carcinogenic PAHs and B(a)P\(_{eq}\) concentration (μg kg\(^{-1}\)) in different sampling sites of Delhi

Fig. 4.6.13. BC distribution in different sampling sites of Delhi

Fig. 4.6.14. Percentage distribution of BC concentration in different soil fractions of Delhi
Fig. 4.6.15. Spatial distribution of BC in Delhi soils
Fig. 4.6.16. Box Plots of BC concentration in different sampling sites of Delhi
Fig. 4.6.17. TOC distribution in different sampling sites of Delhi
Fig. 4.6.18. TOC distribution in different fractions of Delhi soils
Fig. 4.6.19. Spatial distribution of TOC in Delhi soils
Fig. 4.6.20. Box Plots of TOC concentration in different sampling sites of Delhi
Fig. 4.6.21. PAH distribution along the urban-suburban-rural gradient
Fig. 4.6.22. Box Plots of PAHs along the urban-suburban-rural gradient of Delhi
Fig. 4.6.23. Graphical representation of Principal Component Analysis for Delhi soils
Fig. 4.7.1. Linear regression plot showing PAH/BC relationship in Delhi soils
Fig. 4.7.2. Linear regression plot showing PAH/TOC relationship in Delhi soils
Fig. 4.7.3. Linear regression plot showing BC/TOC relationship in Delhi soils
