ACKNOWLEDGEMENT

With great pleasure, I would like to express my profound gratitude. I am indebted to my revered teacher Prof. N. K. Mitra, Department of Chemical Technology, University of Calcutta, whose phenomenal thought process, continuous guidance, valuable advice and benevolent inspiration sparkled throughout the whole period of work without which this work would not have seen the light of the day.

I would like to express my heartiest gratitude to Prof. M. K. Chatterjee, Prof. P. K. Das Poddar, Dr. A. Basumajumdar and Dr. T. K. Parya of Department of Chemical Technology, Calcutta University, for their kind help, without which I think it would have been much more difficult for me to complete this work.

I shall, however, be failing in my duty if I do not record my appreciation and gratitude to all friends of my department who had been associated with the preparation of this thesis at one stage or the other.
