ACKNOWLEDGEMENTS

The research work described in this thesis was carried out in Regional Engineering College, Rourkela under the guidance of Dr. A.K. Behera, Professor of the department of Mechanical Engineering, R.E.C. Rourkela.

The author is extremely grateful to Professor A.K. Behera for his constant encouragement and continuous advice during various stages of this work.

The author would like to express his deep sense of gratitude to Professor A.K. Mohanty, Principal, Regional Engineering College, Rourkela for providing him all necessary help to carry out this research.

He would also like to thank Professor N.S. Das, Professor P.K. Kar and Professor T. Behera for providing all sorts of help in completing his thesis.

He would also like to extend his thanks to the technical personnel of Mechanical Engineering Department for their help, rendered in fabricating and assembling the experimental set-up during experimentation.

Finally the author is very much thankful to his family members especially to his parents and wife, for proving moral support during the research.
