LIST OF FIGURES

2.1 Lay out of drip system 19
4.1 Map of Andhra Pradesh with study location districts 52
4.2 Map of Rangareddy district with study mandals 54
4.3 Map of Anantapur district with study mandals 55
4.4 Map of Kadapa district with study mandals 56
4.5 Map of Nizamabad district with study mandals 57
4.6 Map of Medak district with study mandals 58
4.7 Map of Nalgonda district with study mandals 59
4.8 Weather data of Rangareddy district 62
4.9 Weather data of Anantapur district 63
4.10 Weather data of Kadapa district 64
4.11 Weather data of Nizamabad district 65
4.12 Weather data of Medak district 66
4.13 Weather data of Nalgonda district 67
5.1 Applied water under surface drip and furrow irrigation methods in banana 83
5.2 Water productivity under surface drip and furrow irrigation methods in banana 83
5.3 Power consumption under surface drip and furrow irrigation methods in banana 84
5.4 Fertilizer use efficiency under surface drip fertigation and furrow irrigation methods in banana 85
5.5 Annual and accumulated cash flow under furrow Vs surface drip irrigation in banana 87
5.6 Applied water under surface drip and basin irrigation methods in pomegranate 91
5.7 Water productivity under surface drip and basin methods in pomegranate 91
5.8 Power consumption under surface drip and basin irrigation methods in pomegranate 92
5.9 Fertilizer use efficiency under surface drip fertigation and basin irrigation methods in pomegranate 93
5.10 Annual and accumulated cash flow under basin Vs surface drip irrigation in pomegranate 96
5.10a Relationship between net present value and interest rate under basin and surface drip irrigation in pomegranate

5.11 Applied water under surface drip and basin methods in mango

5.12 Water productivity under surface drip and basin irrigation methods in mango

5.13 Power consumption under surface drip and basin irrigation methods in mango

5.14 Fertilizer use efficiency under surface drip fertigation and basin irrigation methods in mango

5.15 Annual and accumulated cash flow under basin Vs surface drip irrigation in mango

5.15a Relationship between net present value and interest rate under basin and surface drip irrigation systems in mango

5.16 Applied water under surface drip and basin irrigation methods in sweet orange

5.17 Water productivity under surface drip and basin irrigation methods in sweet orange

5.18 Power consumption under surface drip and basin irrigation methods in sweet orange

5.19 Fertilizer use efficiency under surface drip fertigation and basin irrigation methods in sweet orange

5.20 Annual and accumulated cash flow under basin Vs surface drip irrigation in sweet orange

5.20a Relationship between net present value and interest rate under basin and surface drip irrigation in sweet orange

5.21 Applied water under surface drip and furrow irrigation methods in papaya

5.22 Water productivity under surface drip and furrow irrigation methods in papaya

5.23 Power consumption under surface drip and furrow irrigation methods in papaya

5.24 Fertilizer use efficiency under surface drip fertigation and furrow irrigation methods in papaya

5.25 Annual and accumulated cash flow under furrow Vs surface drip irrigation in papaya

5.26 Applied water under surface drip and furrow
irrigation methods in brinjal

5.27 Water productivity under surface drip and furrow irrigation methods in brinjal

5.28 Power consumption under surface drip and furrow irrigation methods in brinjal

5.29 Fertilizer use efficiency under surface drip fertigation and furrow irrigation methods in brinjal

5.30 Annual and accumulated cash flow under basin Vs surface drip irrigation in brinjal

5.31 Applied water under surface drip and furrow irrigation methods in tomato

5.32 Water productivity under surface drip and furrow irrigation methods in tomato

5.33 Power consumption under surface drip and furrow irrigation methods in tomato

5.34 Fertilizer use efficiency under surface drip fertigation and furrow irrigation method in tomato

5.35 Annual and accumulated cash flow under furrow Vs surface drip irrigation in tomato

5.36 Applied water under surface drip and furrow irrigation methods in chillies

5.37 Water productivity under surface drip and furrow irrigation methods in chillies

5.38 Power consumption under surface drip and furrow irrigation methods in chillies

5.39 Fertilizer use efficiency under surface drip fertigation and furrow irrigation methods in chillies

5.40 Annual and accumulated cash flow under furrow irrigation Vs surface drip irrigation in chillies

5.41 Applied water under surface drip and furrow irrigation methods in sugarcane

5.42 Water productivity under surface drip and furrow irrigation methods in sugarcane

5.43 Power consumption under surface drip and furrow irrigation methods in sugarcane

5.44 Fertilizer use efficiency under surface drip fertigation and furrow irrigation methods in sugarcane
5.45 Annual and accumulated cash flow under furrow Vs surface drip irrigation in sugarcane

5.46 NO$_3$ – N levels of water sources under drip and flood irrigated fields
