Acknowledgement

What I have been able to achieve research work has been due to the support, advice, assistance and encouragement of advisors, colleagues and friends. Now I have an opportunity to express my gratitude to them all.

I express my deep sense of gratitude to Prof. Y.K. Agrawal, Director, Institute of Pharmacy and Sciences, Nirma University of Science and Technology, for being my thesis advisor. He is first and foremost a wonderful human being who never ceases to amaze me with his great scientific insight, excellent ideas, kind attitude, energy and drive. He always brings out excellence in data quality, illustration and interpretation. I thank him for his thoughtful and creative suggestions, and for spending his valuable time.

I am thankful to Mrs. Sandhya Agrawal for giving me support and courage.

I have been closely associated with Mrs. Prof. S.K. Menon whose continued encouragement and understanding meant so much. She has influenced and encouraged me throughout my work.

I am deeply obliged to Dr. A.K. Singhvi, Physical Research Laboratory, who introduced me the technique of theroluminescence measurements. I thankfully acknowledge to help provided by P. Morthekai in analyzing the samples at Physical Research Laboratory, Ahmedabad. I express my sincere thanks to Manoj Jaiswal, Yogesh Nagar and Madhav Murari (PRL) for their keen interest and encouragement. I also thankful to Dr. K.V.R. Murthy and Dr. Y. Gandhi (Applied Physics Dept. M.S. University, Baroda) and Dr. B.P. Agrawal (Head, Physics Department, Gujarat University) for their contribution in the thermoluminescence study.

Mere words would be insufficient and insincere in expressing my gratitude and heartiest thanks to my good friends Kautuk Trivedi, Bhavin Sonak, Rakesh Khambholja, Ujjawal Joshi, Shripada Bhatt and Madhu Rupani. Their company in each sphere of life both academic and non-academic had made my research time pleasant and immemorable.
I thank to CDRI, Lucknow and CSMCRI, Bhavnagar for providing spectral data of the samples.

I thank the authorities of IIT Bombay (Powai); Indian Institute of Science, Bangalore; ATIRA, Ahmedabad; PRL, Ahmedabad; Cadila Pharmaceuticals Co. LTD. Ahmedabad; IPCL, Baroda; ABS BAYER, Baroda; GMDC Science and Research Center and specially Raman Research Institute, Bangalore for providing their library facility.

I am thankful to the staff members of Chemistry department and GMDC Science and Research Center for their cooperation I can never forget.

I offer my sincere thanks to all senior and junior research scholars of chemistry department for their cooperation, love and support.

Immense thanks to my relatives and family friends for their motivation, affection and moral support.

I reserve venerable pleasure for my parents, my in-laws and my family members for making me what I am. They always insisted me to complete my research, and never let me loose the ground irrespective of traumas inflicted due to many personal loses in the short span of last 5 years. Mere words cannot adequately express my gratitude to my husband, Nirav Desai for being there whenever I needed him. His boundless love, patience, confidence and understanding give me courage throughout the tenure of this work.

Lastly I thank to the great God for their greatly blessings.

GAURANGI N. DESAI
