ACKNOWLEDGEMENTS

It would not have been possible for me to write this doctoral thesis without the help and support of the kind people around me, and I can make a mention of a few people here. I would like to convey my gratitude to Er.A.C.S Arun kumar, our president without whose patronage this study could not have been done. My thanks are due to, Dr.Meer Mustafa Hussain, Vice chancellor, Dr.G.Gopal Krishnan, Rector and Dr.Thirunavukkarasu, Dean (Research).

I would like express my sincere thanks in abundance to my supervisor Dr.A.Iyem perumal, for his constant help and guidance. He helped me and supported me throughout the course of this work and on several other occasions. My special thanks are due to Dr.S.P.Rajagopalan, my mentor and one of my doctoral committee members for his continuous help, advice, inspiration, encouragement, and continuous support, throughout my study as well in my life. His enthusiasm, integral view on research and his mission for providing high-quality work have made a deep impression on me. During our course of interaction at many meetings, during the last four years, I learnt a lot from him, including how to raise new possibilities, how to regard an old question from a new perspective, how to approach a problem by systematic thinking, data-driven decision making, and exploiting serendipity. Every time, I meet him, I can feel “the fire in the belly” which he always talks about. I owe him lots of gratitude for having me shown this way of research. I am really fortunate to be associated with a person like Dr. S.P.Rajagopalan in my life.

My sincere thanks are due to Dr.T.Johnson, HOD, Department of Mathematics and one of the Doctoral committee members. I would like to thank all the staff members of my department and my colleagues. I would like to thank my beloved wife, parents and brothers for their personal support and great patience at all times and their unstinting support throughout, for which my mere expression of thanks likewise does not suffice.

Last, but by no means the least, I wish to convey my sincere salutes to my dear grandfather Venkata Varadhan who was motivating me a lot to do research work and I dedicate this work to him who passed away recently.

S.DHEVA RAJAN
