ACKNOWLEDGEMENT

I would like to express my deep and sincere gratitude to my Research Guide, Dr. R. Saravanane, Associate Professor, Department of Civil Engineering, Pondicherry Engineering College, Pondicherry, for his excellence guidance and whole hearted involvement during my research work. His understanding, encouragement and personal guidance have all contributed to the present form of the thesis.

I am deeply grateful to Dr. P. Sambasiva Rao, Professor and Head, Department of Chemistry, Pondicherry University, Pondicherry, and a member of the Doctoral Committee, for his constructive comments, and support throughout the period of this work.

I specially thank Dr. T. Sundararajan, Professor, Department of Civil Engineering, Pondicherry Engineering College, Pondicherry, and a member of the Doctoral Committee, for his constant involvement in making my research work more significant by providing constructive suggestions during the entire period of research work, as well as during the preparation of this Thesis.

I extend my sincere thanks to Shri N. Kesavan, Chairman, Shri M. Dhanasekaran, Managing Director, Shri S.V. Sugumaran, Vice-Chairman of Sri Manakula Vinayagar Engineering College, Madagadipet, Pondicherry, for rendering their constant encouragement to carry out the present research work and to complete it at the earliest. I also extend my sincere thanks to Dr. V.S.K. Venkatachalapathy, Principal, Sri Manakula Vinayagar Engineering College, Madagadipet, Pondicherry, for his constant support, motivation and timely suggestions.

I am also thankful to Dr. D. Govindarajulu, Professor of Civil Engineering and Chairman-CBCS, Dr. M.A. Sivasankaran, Professor of Civil Engineering and Dr. S. Kothandaraman, Professor and Head of Civil Engineering Department, all from Pondicherry Engineering College, Pondicherry, for their moral support and encouragement during the period of this research work.

It is indeed my pleasure to thank all the Faculty members of Civil Engineering Department, Pondicherry Engineering College, Pondicherry, for their moral support and encouragement.
I also extend my sincere thanks to all the non-teaching staff of Civil Engineering Department, Pondicherry Engineering College, Pondicherry, for all their help and assistance in conducting the relevant experimentation work.

I express my warm and sincere thanks to Dr V Krishnamurthy, Founder - President and Director, Krishnamurthy Institute of Algology, Chennai, for his keen effort in this work, especially, the identification of the algal species.

I also wish to thank Dr. S. Ganesan, Director – Students Affairs, Anna University, Chennai, for his motivation and facilitation rendered by him to obtain GC-MS data from Anna University, Chennai.

I thank the staff members of Central Instrumentation Facility, Pondicherry University, Pondicherry, for their timely help in acquiring data using the various sophisticated equipments.

I owe my sincere gratitude to Dr. V. Ravitchandirane, Associate Professor, Department of Zoology, Kanchi Mamunivar Centre for Post Graduate Studies, Pondicherry, for all the valuable help extended by him in algal extraction process, required for various analytical and experimental investigations.

I also thank Dr. K. Subramani, Associate Professor, Department of Chemistry, Kanchi Mamunivar Centre for Post Graduate Studies, Pondicherry, for his kind and timely help, in interpreting FTIR and GC-MS spectra and to obtain the relevant data therefrom.

I would like to record my sincere thanks to Dr. Mustafa Shameel, Meritorious Professor (Retd.), Department of Botany, University of Karachi, Pakistan, for his spontaneous help in interpreting the GC-MS spectra and extracting the relevant data.

I wish to thank Mr. S. Thiagarajan, Public Analyst (Retd.), Public Health Laboratory, Government of Pondicherry, Pondicherry, for his kind help in proposing the mechanism of biodeterioration of concrete.
I am very much thankful to my friends Dr. S. Sendhilnathan, Assistant Professor, Anna University, Tiruchirappalli, Mr. K. Velmurugan, Assistant Professor in Mechanical Engineering and Mr. N.S.N. Cailassame, Placement Officer, Sri Manakula Vinayagar Engineering College, Pondicherry, for their constant support and motivation.

I thank all the staff members of Sri Manakula Vinayagar Engineering College, Madagadipet, Pondicherry, for their friendly words of encouragement during the course of my research work.

It is my pleasure to thank Mr. B. Radjaram, Mr. K. Nagakarthigan, Mr. S. Sundararaman and Mr. S. Balasubramanian Research Scholars of Civil Engineering Department, Pondicherry Engineering College, Pondicherry, for their support and encouragement.

I would like to record the sincere affection, constant support and cooperation extended by all my family members which has contributed to a great extent to complete my research work to my satisfaction and in a befitting manner.

Last, but not least, I record my sincerest thanks to my father Mr. S. Sri Hari Babu, for the sustained help and remarkable contribution to carry out the field investigations and for extending his fullest possible cooperation, which, I believe, have made this research work a significant and a memorable one.

Finally, I owe my deepest gratitude to the Almighty who provided me with all the required help, strength and perseverance to carry on with the work and culminating in this Thesis. To Him this is reverentially dedicated.

S. Jayakumar
