List of Photographs

Picture 1
Pressure Parboiling hundies for Parboiling Method - 249

Picture 2
Waste Disposal Site of the Rice Mill - 257

Picture 3
Steam being generated during the rice milling process - 259

Picture 4
Waste water generated by the rice mill during the milling process - 262

Picture 5
Dust generated during the paddy cleaning process - 264

Picture 6
Air Pollution through chimney of the rice mill - 266

Picture 7
Air Pollution through chimney of the rice mill - 268

Picture 8
Air Pollution through chimney of the rice mills - 272

Picture 9
Waste water generated during the rice milling process - 273

Picture 10
Waste water passes to the nearby agricultural field causing enormous problem to the farmers - 273

Picture 11
Air Pollution through chimney of the rice mill - 286

Picture 12
Waste water generated by the parboiling hundies - 286

Picture 13
Waste water passes through the rice mill premises - 287

Picture 14
Waste water passes through the drain of the rice mill - 287

Picture 15
Waste water of the rice mill reaches the nearby agricultural field - 287
Picture 16
Dust generated during the cleaning of the paddy – 290

Picture 17
Storage of paddy is done by the workers of the rice mill – 291

Picture 18
Drying installation of a rice mill – 294

Picture 19
Rice husk is used as fuel in Boilers – 305
