ACKNOWLEDGEMENTS

Guidance, Inspiration and Support are the three main factors behind any successful work. I take the pleasure of thanking all those who have helped, supported and gave constant encouragement throughout my research work. It would not have been possible to be completed in time without the kind people around me, to only some of whom it is possible to give particular mention here.

At this moment, I am exceedingly delighted in expressing my most sincere gratitude to supervisor Dr. K, Ajay Kumar, M.Sc., Ph.D., Associate Professor, Department of Chemistry, Yuvaraja’s College, University of Mysore, Mysore for the continuous support for my research work, for his esteemed guidance, keen interest, sustained patience, motivation, constant availability, enthusiasm and immense knowledge. Throughout my research period, I received from him constant guidance, valuable suggestions, continuous inspiration and creative ideas whenever I need. I always got best advices, which are useful for my research work. His guidance helped me in all the time of research. Without his loving care and priceless supervision, it could not have been possible to prepare the thesis in this form. For this I will remain always thankful to him.

With great proud and privilege, I express my profound sense of gratitude and heartfelt thanks to Dr. K, M. Lokanatha Rai, M.Sc., Ph.D., Professor of Organic Chemistry, Department of Studies in Chemistry, University of Mysore, Manasagangothri, Mysore, for the inestimable guidance, insightful suggestions, inspiration and support rendered throughout my study.

It gives me a great honour in thanking all faculty members, Department of Studies in Chemistry, University of Mysore, Manasagangothri, Mysore, to complete my Ph.D. course work successfully conducted by the University of Mysore.

I am deeply obliged to the authorities of the institutions for granting permission and extending full co-operation, help and support in carrying out the research work.
I am grateful to the former Principals and the present Principals of Yuvaraja’s College and Maharani’s Science College for Women, Mysore, for providing me the facilities for this work.

With a deep sense of gratitude, I wish to express my sincere thanks to all the faculty members of Department of Chemistry, Yuvaraja’s College, for their kindly help. I take this opportunity to express my thanks to Dr. Shaukath Ara Khanum for her help and co-operation.

My special thanks to my colleagues, Department of Chemistry (PG and UG) Maharani’s Science College for Women, Mysore, for their helpful suggestions and moral support during hours of need.

I am extremely thankful to Dr. B.P. Dayananda and Dr. T.N. Kiran Kumar, Post Graduate Department of Studies, Maharani’s Science College for Women, Mysore for their encouragement and valuable suggestions.

I wish to express my gratitude to Dr. S. Mahadevmurthy, Department of Microbiology, Yuvaraja’s College and Dr. M.P. Raghavendra, Post Graduate Department of Microbiology, Maharani’s Science College for Women, Mysore for help in conducting microbiological screening of this work and also grateful to Dr. M. A. Harish Nayaka, Department of Sugar Technology, University of Mysore, for his help in screening antioxidant activity and reducing power ability.

I am very much thankful to IISc, Bangalore, NMR research center, SAIF, Madras and CSMRI, Bhavnagar for the help in recording NMR spectra and Department of studies in Physics, University of Mysore for X-ray crystallographic studies.

I extend my thanks to all staff of CFTRI library, Mysore for their sincere support for successfully completing my literature review work connected with research.

I am also heartily thankful to all the members of non-teaching staff of Yuvaraja’s College and Maharani’s Science College for women.
My acknowledgement remains incomplete if I don’t mention the help, encouragement and companionship of my research colleagues and friends, Sri M. Govindaraju, G. Pavithra, N. Renuka, D. M. Lokeshwari, V. Lakshmi Ranganatha, T. Prashanth, P. Naveen, Bushra Begum and Mohammed AL-Ghorbani for their support.

I am extremely sincere to my brother-in-law, K Prabhakar, Crawford Hall, University of Mysore, Mysore for his timely help and useful suggestions. My special thanks to my parent-in-laws, sisters, sister-in-law and all of other relatives.

Also my sincere gratitude towards many more well-wishers, friends and relatives who directly or indirectly rendered me valuable help and moral strength during this work.

I acknowledge my sincere regards to University Grants Commission, New Delhi, for the award of Teacher Fellowship and financial support which helped me to complete my research work successfully.

I feel a deep sense of gratitude to my family members. Especially to my daughter Neha Ramesh and son Rohith R. Kuthnikar, who spent many days with relatives to allow me to focus. I am deeply sorry for the time we spent apart and also my beloved husband P. Ramesh who always inspired me for not only to work hard but also work by heart for any success. Without their support, I would never have succeeded.

My gratitude would be definitely incomplete if I forget to bow my head before THE ALMIGHTY, “THE WONDER CHEMIST” of this lovely world for giving me the opportunity in my life to complete this academic endeavor.

P. Jayaroopa
