Acknowledgement

With a deepest sense of gratitude, I would like to sincerely thank my supervisor Professor Diwan S. Rawat, for his wisdom, encouragement and providing an environment conducive to discussions. I am deeply indebted to him for his invaluable guidance, enthusiasm, advice, and academic support throughout my research work. His scientific temperament, refreshing ideas, crucial and rationale analysis helped me to handle the complexities of most problems either be it experimental or the general routine. His wide knowledge and his logical way of thinking have provided a good basis for the present thesis. In particular, his meticulous feedback on the often-erroneous drafts of thesis was incredibly helpful in making it presentable. His trust and belief in me inspired me to take the right decision in the most important moments and carrying out this work successfully. He has always been a constant source of inspiration for me.

I am extremely grateful to Prof. S. M. S. Chauhan, Head, Prof. V. S. Parmar (Ex. Head) and Prof. A. K. Bakhshi (Ex. Head), Department of Chemistry, University of Delhi for providing all the possible research facilities in the department. I would like to express my sincere gratitude to members of my Advisory Committee Prof. J. M. Khurana and Dr. M. Nath who mentored the progress of my work and offered critical insights from time to time.

I extend my thanks to Prof. P. Mathur, Prof. R. C. Rastogi, Prof. S. Kukreti, Prof. A. K. Prasad, Dr. S. K. Awasthi, Dr. R. Gupta, Dr. K. Gopalaiah, Dr. S. Singh, Dr. A. K. Verma, Dr. V. Tandon and Dr. R. Singh for their encouragement and motivation.

I would like to acknowledge Dr. Nilanjan Roy (National Institute of Pharmaceutical Education and Research, Mohali), Prof. Tanya Parish (Infectious Disease Research Institute, USA), Dr. Binge Wang (Georgia State University, USA), Dr. Ramandeep Singh (Translational Health Science and Technology Institute, Gurgaon), Dr. Anil K. Tyagi (South Campus), Dr. Amir Azam (Jamia Milia Islamia University) and Dr. Santosh Pasha (Institute of Genomics and Integrative Biology, Delhi) for their help in all respect to screen massive number of compounds for their biological applications which are reported in this dissertation.
I would like to thank Prof. K. Sreenivas, Director, USIC-CIF for developing the centre and making it possible to get all the analytical data. I also thank Mr. Dheeraj, Mr. Amit, Mr. Hariom, Mrs Seema and Mr. G. Daspa for providing the analytical data. I would also like to acknowledge SAIF-CDRI-Lucknow for providing mass data.

I am thankful to the staff of Department of Chemistry in particular Mr. Baldev Singh, Mr. Narender, Mr. Amit and Mr. Saroj for their assistance in several administrative matters throughout this venture.

A very especial thank to Mr. Ashokan for repairing and making glass apparatus which were essential for carrying out my experimental work. A special thank to Mr. Balkrishan Mathpal for his kind help.

I highly acknowledge the Central Science Library-DU and Departmental Library-Chemistry for web facilities, journals and books.

I would like to say thanks to my seniors Dr. Gopal Singh Bisht (Assistant Professor Jaypee University), Dr. Mukesh C. Joshi (PDF), Dr. Penny Joshi (PDF, Roswell Park Cancer Institute), Dr. Himanshu Athaeya (Quality Control Officer, IOCL), Dr. Ritu Mamgain (Assistant Professor Graphic Era University, Dehradun), Dr. Mukul Sharma (Scientist, Cadila) and Dr. Nitin Kumar (Scientist, Fresenius Cabi) for their kind support and guidance. It is an opportune time to thank all my lab colleagues Seema, Sunny, Deepak, Rini, Anuj, Rajesh, Mohit, Reddy and Amit for their cooperation.

The financial assistance provided by Council of Scientific and Industrial Research (CSIR-JRF/SRF) and University Grant Commission (UGC-UTA) is gratefully acknowledged.

It is a blessing to have good friends around. I am greatly indebted to my friends Arti, Divya, Jyoti, Kapil, Neeta, Prerna, Priyanka, Ritu, Shipra, Sohail, Sunita, Surender, Sushil, Vineeta, Vikas, Vivek and all my colleagues at DU with whom I have shared moments of joy and happiness. I cannot express in words my gratitude towards my friends Manju Saroj and Deepak Kumar for their suggestions, ideas and support.
I cannot forget the love, understanding and constant emotional support that my family provided during my scientific endeavors. I feel so enthusiastic to acknowledge my sister Geeta and my brother Sanjay for their immense love, affection and playing a role of stress buster throughout this course.

I express a deep sense of gratitude towards my Dadaji Shri K. S. Negi, Dadiji Late Smt. Anandi Negi, Nanaji Shri J. S. Negi and Naniji Laxmi Negi for their love and concern. No words are sufficient to express my gratitude to my parents Mr. R. S. Negi and Mrs. Pushpa Negi who are my inner strength and showed me the light to reach up to this stage. Thus I have a great pleasure in dedicating this work to them. I am especially grateful to my mother because she is the only one who always stood by me even through the extremes of circumstances in all phases of my life.

Finally, I would like to acknowledge the grace of the Divine Providence.

This is a big chapter of my life and with the experiences gained here, I am hopeful to witness enriching years ahead.

— Beena
