First and foremost, I am grateful to the God who always blesses me by giving me good health and wisdom throughout this research.

I would like to convey my gratitude and warm felt appreciation to my supervisor Dr. Dinesh Kumar for his invaluable advice, constant source of inspiration and guidance in the completion of this research work. His guidance helped me in all the time of research and writing of this thesis. I could not have imagined having a better advisor and mentor for my Ph.D. study. Under his scholarly guidance, things always looked within reach, in fact without his consistent critical suggestions, cheerful encouragement and sincere guidance this thesis would have remained futile.

I also gratefully acknowledge my research guiding committee members Dr. Somesh Sharma, Dr. Pankaj Chauhan and Dr. Amit Seth, Faculty of Applied Sciences and Biotechnology for their constant help during this work.

I wish to express my sincere thanks to Professor P.K. Khosla, Vice Chancellor, Shoolini University for providing me with all the necessary facilities for the research and to make my career bright.

I place on record, my sincere thanks to Dr. Anuradha Sourirajan, Dean, Faculty of Applied Sciences and Biotechnology for her continuous encouragement and useful scientific discussion, suggestion and integrity in pursuit of excellence.

I am also grateful to Dr. Rohit Goyal, Faculty of Pharmaceutical Sciences. I am extremely thankful and indebted to him for sharing expertise and his help in epithelial cells adherence assay.

I am also thankful to Dr. Duni Chand, Department of Biotechnology, Himachal Pradesh University, Shimla, India for his help in microencapsulation work in the present study.

I am also thankful to Mr. Sandeep, IIT, Mandi, H.P., India for his help in scanning electron microscopy work in the present study.

I take this opportunity to express gratitude to all faculty members for their help and support.
I am also grateful to my friends Nazam Khan and Vineeta Sharma who supported me throughout this venture.

I wish to acknowledge the contribution of Mr. Kamlesh Verma for his assistance in collection of fruits.

I would like to take this opportunity to dedicate my deepest appreciation to my fun-loving colleagues for enduring together the countless hours and sharing good ideas in completing this research. I thank my fellow labmates Preeti Dogra, Karan Surya, Shampy Duggal, Shivangi and Komal Sharma for the stimulating discussions, for the sleepless nights we were working together before deadlines and for all the fun we have had in the last four years.

I would like to thank Lab Attendants Mr. Dalip and Mr. Rohit for providing me their help and support for completing this research project.

Last but not the least, I would like to thank my family: my parents Capt. Lekh Raj and Kashmiri Devi for giving birth to me at the first place, supporting me spiritually throughout my life and providing money to buy everything (Internet, Books, Laptop) related to this project work and their love, blessings, advice and support.

(Ashwani Kumar)
