ACKNOWLEDGEMENTS

With utmost gratitude, I express my sincere thanks to my supervisor Dr. K.Mohan Rao, Principal, VR Siddhartha Engineering College, Vijayawada, for his guidance and support, during the course of this research work. Motivation received from him to carry out the research work in the field of smart composites structures is deeply acknowledge. I have learnt many positive things working with him in the initial stages of my teaching career in PVP SIT.

I express my heartfelt thanks to my co-supervisor Dr. J.Suresh Kumar, Associate Professor, Dept. of Mech. Engg., JNTUH college of Engineering, Hyderabad, for his constant encouragement and regular follow up, which kept me focused towards the goal. I acknowledge the encouragement and advice given by him at various stages of the research work, and I thank him for the untiring effort in refining this report.

I am indebted to express my deep sense of gratitude to my additional co-supervisor Dr. S.Raja, Scientist E-II, National Aerospace Laboratories, Bangalore, for his guidance in carrying out experiments at National Aerospace Labs. I feel fortunate to work with such a personality, who always showed perfection, no matter what he does. It was pleasure working with him, and I acknowledge the valuable discussions with him, which made me, understand not only the ‘vibration control’ but the concept of eternal life and GOD almighty in a better way.
My sincere thanks are due to Vice Chancellor of JNTU, for the permission accorded to carry out the experimental part of this research work at NAL. I would like to Thank Director, NAL and Head of Structural Technologies division, NAL for the opportunity given to me to work with Aero-elasticity group.

I would like to thank Mr.D.Dwarakanathan, Scientist-C, and Mr.U.Ashwin Shriyan, Research Assistant, of Smart structures and aero-elasticity group, for their assistance in FE coding using MATLAB and useful discussion at different stages. I am very much thankful to Mr. B. Balakrishnan and M.P. Vijaya Kumar for providing accommodation and their support in many aspects. Especially I am grateful to Mrs. Sasikala Rajappa, Mr.H.M.Ragavendra, Ms. Sudha, Mr. Prasanna and Mr. Eranna of structures group for their help in various stages, to conduct the experiments successfully. I would like to specially thank my uncle Sri D.Babu Rao and his family for providing accommodation when I was in Bangalore, for experimental part of this research work with family. I also would like to thank Sankardoss uncle and his family for their support throughout our stay in Bangalore.

My profound thanks are due to our Principal Dr.K.Srinivasu, Head of the Department, Dr. K. Sivaji Babu and Dr.V.Balakrishna Murthy, Professor, Mechanical Engg. Dept., for their cooperation and suggestions at various stages of this work. I deeply acknowledge the
support of all my colleagues at mechanical engineering department of PVP Siddhartha institute of technology, Vijayawada.

I thank my family and friends for their support. I would specially like to thank my father who stood as an example for utmost sincerity in what ever he does and my mother who inspired me with her patience and perseverance. I thank my wife for her understanding, support and involvement in each and every stage during this work. Without the whole hearted encouragement of her, it would have been impossible to complete this thesis. I would also like to thank my elder brother, sister-in-law, niece, nephew and my younger sister, brother-in-law and cousins for all the encouragement and support that they provided during this period. I also would like to thank my in-laws family, especially my father in-law, who is my role model in sincerity and honesty. I thank him for constant encouragement he gave, during this research work. Special thanks are due to mother in-law, sister in-law and brother in-law for taking care of my daughter when I was busy preparing this report.

Finally, this thesis is the result of four and half years of work, during which I have been supported and encouraged by many people. I express my gratitude to all of them who helped me either directly or indirectly.
