Re-engineering of Library and Information Services Through Internet

Jutika Nanda Das

To cope up with the changes which is taken place in today’s globalize society no library can go towards the proper direction to satisfy their clients without a proper internet connectivity. The entire library has to provide internet as a service for in-house operation in the library. Internet has played a tremendous role to development of the society or in the field of library and information services. The development of E-Book and E-Publishing has challenged the traditional role among publisher’s book stores and library and information service in many ways. This paper throws light on how a user help by the library to give or provide internet based service with proper web sites and web address with the help of latest IT and communication technology.

Keywords: Re-engineering, Internet, Information Technology, Web Page, e-book, Digital Library

1. Introduction

Library has always been creators or publishers of scholarly information. In the recent times libraries creative role have mainly been the possibility of accessing all the knowledge ever produced by human race. The digital technology of recent times has changed the thing done in the past and created unprecedented new means of storage, retrieval and dissemination of information. Technology has changed the way people thing, work and communicates. It has made possible new ways to create knowledge and to disseminate and use of information technology has impacted libraries significantly, whether it is decreased door counts or increased use of virtual resources and especially academic libraries have faced a great deal of changed in recent years. Users have more options than ever for filling their information needs. LIS professional must be creative and innovative in order to serve their user or client to the fullest. Professional have to reach more users in a verity of users in a verity of ways as their collection and services move in to an increasingly virtual environment, they have to provide their users greater access to in-house as well external resources which is exactly what they want.

2. Internet

Internet is a network of networks, when tens of thousand of computers connected to a world wide network, talks to one another through a common communication protocol. Originally designed to be inter-network connecting scientific and educational institutions. Internet is the most important place today to look for any type of information especially general reference sources. Now there are lakes and lakes of libraries and database in the internet. Now a day’s maximum numbers of library to provide their
service through internet only. We can see the public libraries, libraries of specialized research institutes, video libraries, sound record collections and many more things. Seating on a chair in the home or office anybody can fly to the reading reference room of the libraries existing in other side of the globe. Internet is a part and parcel of library services of any kind of library in today's world.

Here in this paper I discussed some birds eye view of the libraries and related sites on the internet which will be useful to information service professional to help all type of users. Subject wise presentation of all the sites and the necessary information is discussed.

5.3 Sociology
(i) SOLO lifestyles for singles: - This site gives us current and interested topics in today’s Signals and also offers personal ads matchmaking services. To log on this site - www.solosingles.com

5.4 Public Administration
(i) Fed information network: - This sites links to every federal government web sites there is. It provides most of valuable links listed on the main page. To log on this page www.fedworld.gov/

6. Language
(i) Hypertext Dictionary: - This is an online dictionary enter the word about which we want more information in the space provided and submit our entry. To log on this site- http://c.gp.cs.edu.5103/prog/webster
(ii) SIRS: The knowledge source: - knowledge source is a list of links of sites on the web organized according to the topics included on the SIRS CD- Rom database. To log on this site- Product http://www.sirs.com/tree.html

7. Natural Science and Mathematics
(i) Alfred science and mathematics for polar and marine Research: - Here we can get huge amount of information about the global change research. To log on this site- http://wwwawi_bremehaven.de

(ii) NASA Home page: - This is the home page for the National Aeronautical and Space Administration. Click on gallery and you can see the photograph taken from space. To log on- http://www.nasa.gov/nasa_homepage.html
(iii) Science for millennium:- It is an online expo emphasizing outer space, advanced computing and virtual environment with multimedia files. To log on – www.ncsa.uiuc.edu/cyberia/expo

7.1 Astronomy
(i) Astronomy related web sites:- this site offer extensive listing of astronomy related web sites and indicate brief description. To log on- www.skypub.com/links/astroweb.html
(ii) Solar system stimulator:- If we pick up our planet position, data, time and field of view the stimulator to see the universe from our own special standpoint. To log on this site- http://Space.jpl.nasa.gov

7.2 Physics
(i) Albert Einstein:- the image and impact:- many document on Einstein and Einstein in various media are stand in this site. To log on – www.aip.org/history/einstein
(ii) Virtual reality version:- we can see the thousand of virtual reality movie on subject on this site. To log on this site- http://Sherpa.sandia.gov/asteriod
(iii) Earth from Space:- the library contains database having more than 2,50,000 Photographs of earth. To log – http://earth.jsc.nasa.gov

7.3 Biology
(i) Cells Alive: - The library contains mug shots and movie of microscopic cells. To log on- www.cellsalive.com
(ii) Tree doctor:- this is the place to go to find answers to your quarries from urban tree, all about the diseases and pests, tree topping the tree doctor will gladly answer our quarries. To log on this site- www.1stresource.com/t/treedoc/
(iii) Visual human project:- This site contains detail representation of the male and female human body. To log on- www.nlm.nih.gov/research/visible/visible_human.html

7.4 Animal
(i) AVMA network:- American veterinary Medicine Association:- this site is an excellent source for information on caring for our pet. To log on- www.avma.org
(ii) Pet care corner:- this site is owners questions asking about their pets health. To log on www.pet_vet.com?index.html

8. Technology and Applied Science
(i) Ask an Earth:- Science and Technology: The site contains ask on expert E-mail Addresses and web site from astronomers and nuclear power expert. To log on- www.askanexpert.com
(ii) Department of Electronics, India:- Gives information about the department and its organization, staff and activities. Also provide information about Indian electronics and information technology industry. To log on- www.doe.gov.in

(iii) Indian Web service:- Many educational research institutes of India listed here can be accessed through web sites of institute of mathematical science. To log on- http://www.imsc.ernet.in/serverhtml

8.1 Medical Science

(i) American Heart Association National enter:- here we can get the guidance of how to save from heart stock and over 300 article on related to the heart disease. To log on- www.amhrt.org

(ii) Ayurveda College online:- It is a project of jiva institute, faridabad. Through this sites We get information about ayurveda. To log on - www.ayurvedic.org

(ii) CDC home page:- gives information on disease, health risks, prevention, guidance and Strategies. To log on- www.cdc.gov

(iv) Medicine online:- serve as a commercial online medical information service. Serve as a get way to access other health information service on it. To log on- www.meds.com

(v) National Institute of Health: - this site gives news reports and a reach set of links including consumers' health services and guide to other health institute. To log on - www.nih.gov

8.2 Engineering

(i) Automotive learning online:- this site is an online peck under the hood for the automatically challenged with automation and diagrams showing how our car system work. To log on- www.InnerAuto.com

(ii) Home Team: - Contains information on intelligent home design, lighting Controls Standards security system, communication system and more. To log on- www.hometeam.com/

8.3 Computer Science

(i) Web developers virtual library:- this simple savvy site offer link to important style guides, technical sites, development tools, and even web related jobs, listing. It also features spectrum. The WDVJ journal, an online magazine. Whether we are choosing a web server or examining our use of hypertext, spectrum is the e-zinc. To log on- http://www.enterprises.net/stars

9. Fine Arts

(i) Metropolitan museum of Arts, New York:- One of the largest art museum in the world, its collection more than two million works of Arts. 5000 years of work culture. www.metmusum.org

It includes the Indian version of electronics journal and many more. Some services are free and for some we have to pay fee. http://www.indiaworld.com;1500/open.world/index.html
(iii) Virtual Turist2: VT2 is a web’s most extensive for library of community maps. Here we can find general information, tourist guide and maps of thousand of places. To log on-http://www.vtourist.com/vt/

12. Journal
(i) ARL: Directory of Electronic Journal: This project is from Association of Research Libraries here we can get the information all journal and newsletters and the subscription information. To log on- www.http://ral.cni.org/pubscat/publist.html
(ii) Career Magazine: this on-line magazines gives list of current jobs opening, resumes on-line, employer profiles, as well as to link to career information. To log on-http://careermag.com/creemag
(iii) News Link: this is the most comprehensive on-line news resource featuring 558 news papers, 420 broadcast, 572 magazines, and 531 special links, surveys and top ten list. Publisher’s sites, magazine sites and Research sites all this information we can get this site. To log on-http://www.newslink.org
13. Conclusion

Internet has played a pivotal role in materializing the effectiveness of communication system to the doorsill of users. The development of country primarily depends upon the advancement of communication technology. The convergence of information technology and communication technology has helped us to reach to a particular goal in the technological scenario of the world. The library is the present days explored the electronic book service through adoption of new technological devices and disseminated properly in an organized manner which not only facilitated the academic professional but some other users also. With the help of internet any one can make an endless thematic tour through information on libraries around the world. Internet provides instant access to billions of information sources, which includes books, reports, journals, video films, and sound recordings on any topics. Present day library can't fulfill the needs of users without a proper internet connection. The increasing amount of price of all the books and journals no library can serve towards the right direction to its users/ clients but through the proper connectivity of internet the purpose can be fulfilled with satisfactory manner. Due to this recent development of IT, the scenery of the traditional library or the services of the traditional library has changed tremendously and rapidly, to cop up with the change we can't ignore the internet service to introduce in the library in house operation duties.
