

POPULATION INFORMATION ON INTERNET

by

Praveen Kumar K*

ABSTRACT

The population information is an important source for the nations to plan and implement the different programmes for the development of nations. The population science covers various subjects like Demography, Fertility, Mortality, Migration, Nuptality etc. The information on these fields is available in different information sources like Popline, Online Journals, CD-ROM etc. These sources are also available on Internet which can be exploited for the benefit of the users. This article presents some important web sites and e-journals with their URL which provide population information.
