INTRODUCTION

As AI technology evolves, libraries are leveraging its capabilities to improve various services, from cataloging to information retrieval.

This study explores the integration of AI in libraries, a rapidly evolving field that can enhance service delivery, streamline operations, and improve access to information.

LITERATURE REVIEW

- Numerous studies on AI in libraries have been conducted, including empirical research, conceptual papers, and literature review papers. This paper used Google Scholar to collect papers from March-April 2024, focusing on keywords “artificial intelligence AND library” in the time range of 2016-2024.
- Previous studies concentrated on literature review of artificial intelligence and machine learning for library professionals (Khanzode & Sarode, 2020), bibliometric analysis of AI trends in library services (Barsha & Munshi, 2023; Borgohain et al., 2022; Das & Islam, 2021; Echedom & Okuonghae, 2021; Gasparini & Kautonen, 2022; Harisanty et al., 2023; Hussain, 2023; Nugroho et al., 2023; Song et al., 2020; Vasishta et al., 2024; Yoganingrum et al., 2022).

RESEARCH OBJECTIVES

To explore and understand College Librarians' Literacy, Ethics, Self-efficacy, and Self-competency towards Artificial Intelligence (AI).

RESEARCH HYPOTHESES

H1 :

Majority of College Librarians in Assam are not engaged with AI;

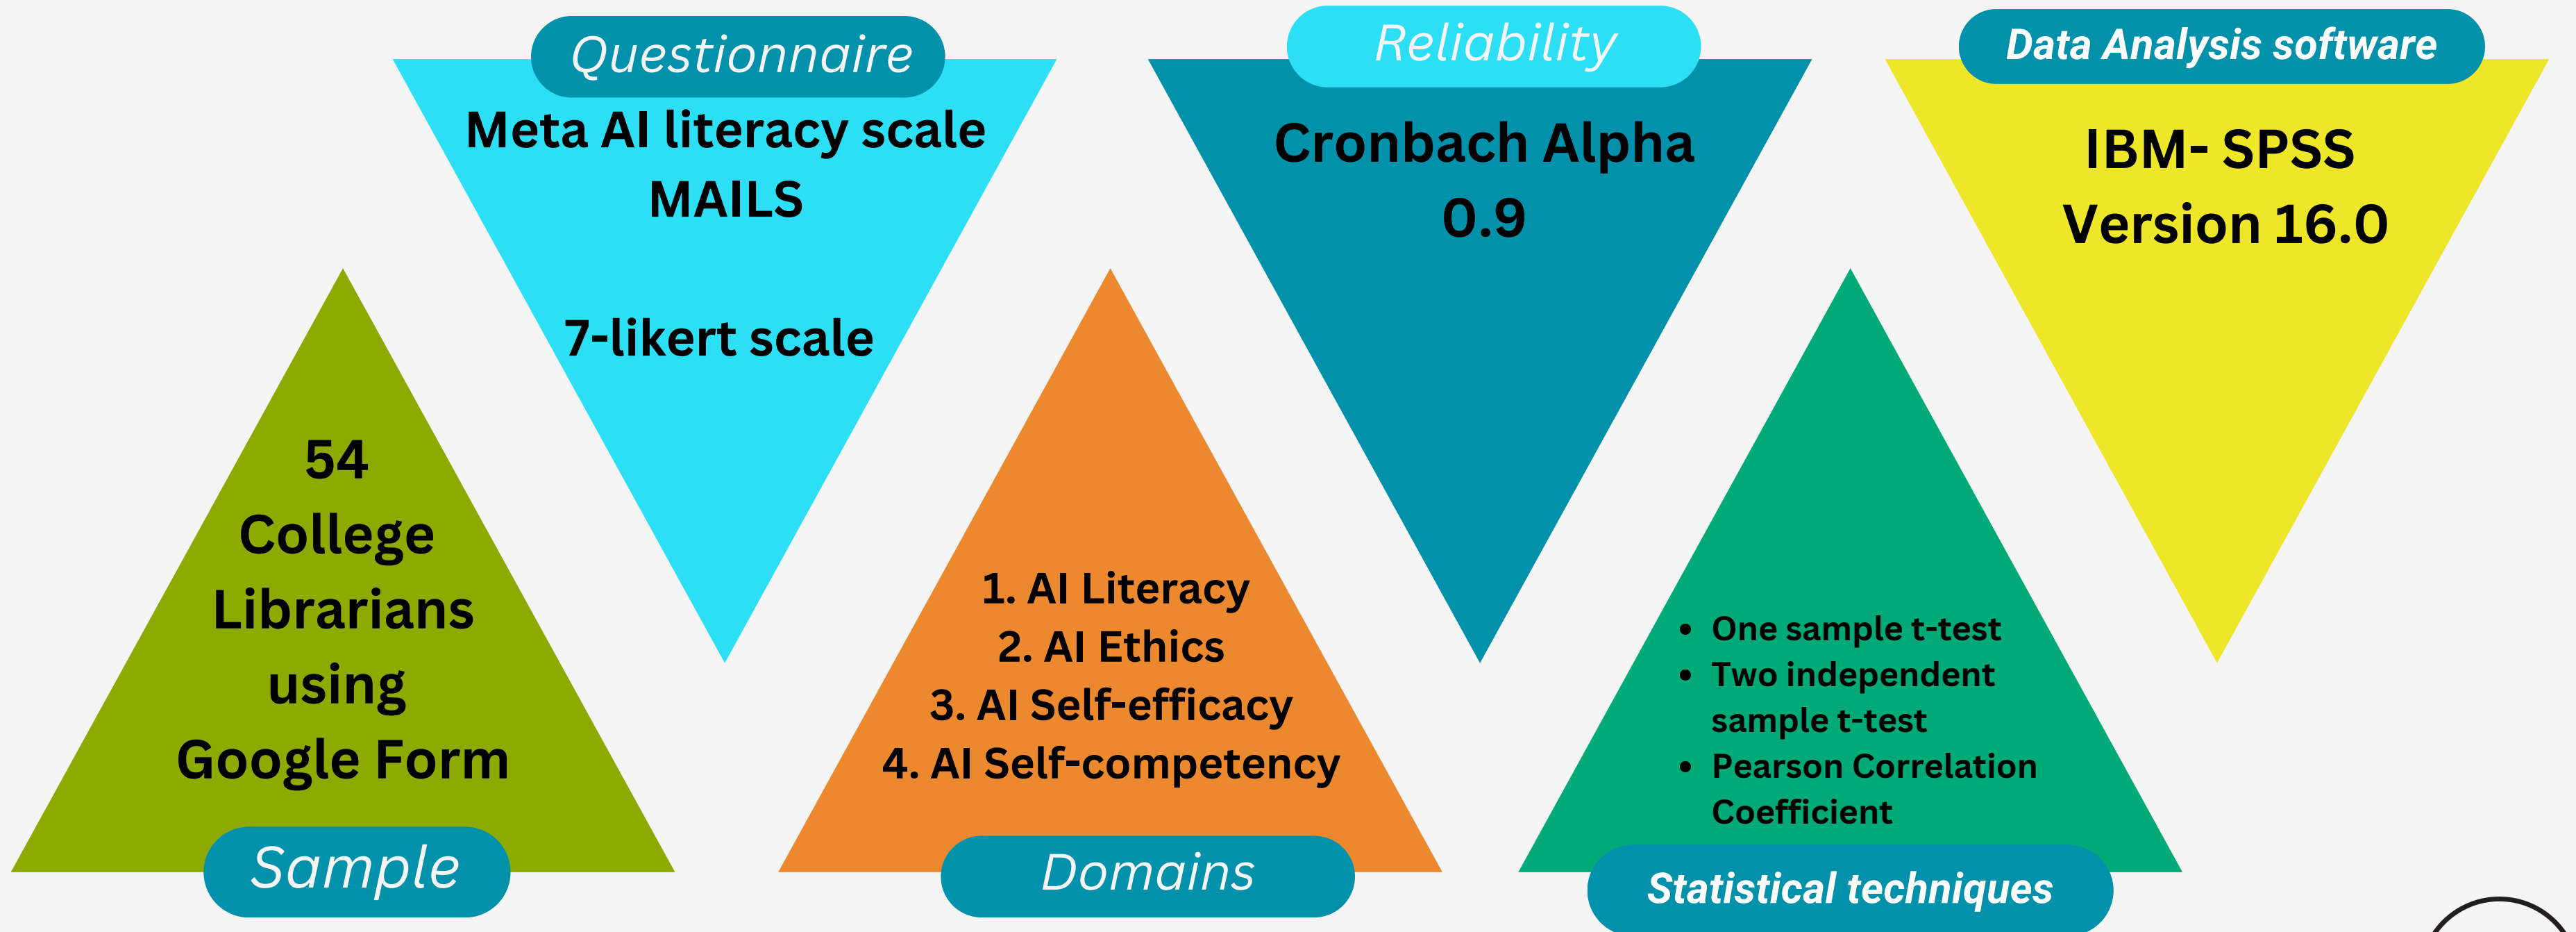

H2 :

There are no significant differences between male and female College Librarians' engagement with Artificial Intelligence in Assam.

H3 :

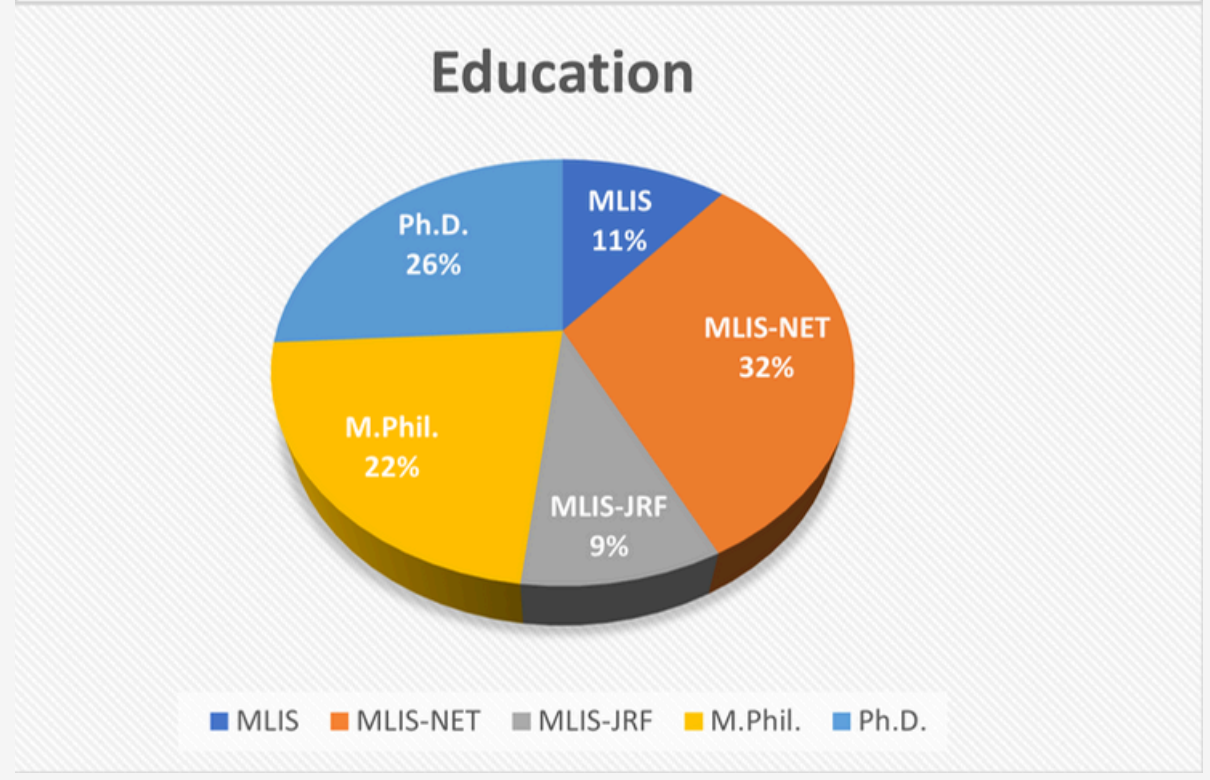

There is no significant linear relationship between College Librarians' AI literacy, AI Ethics, AI self-efficacy, and AI self-competency in Assam.

RESEARCH METHODS

RESULTS

Sample

RESULTS

H1: College Librarian's Engagement with AI

One-sample t-test

$t(53) = 2.367$

$p = 0.022$

There was a statistically significant difference between means ($p < .05$).

Hypothesis- Rejected.
Result-
Majority of College Librarians in Assam are engaged with AI.

RESULTS

H2: Gender and College Librarians' Engagement with AI in Assam

Two independent sample t-test (Male & Female)

AI Literacy

$t(df) = -0.855$
 $p = 0.397$

AI Ethics

$t(df) = -0.439$
 $p = 0.662$

AI Self-efficacy

$t(df) = -0.563$
 $p = 0.576$

**AI
Self-competency**

$t(df) = -1.650$
 $p = 0.105$

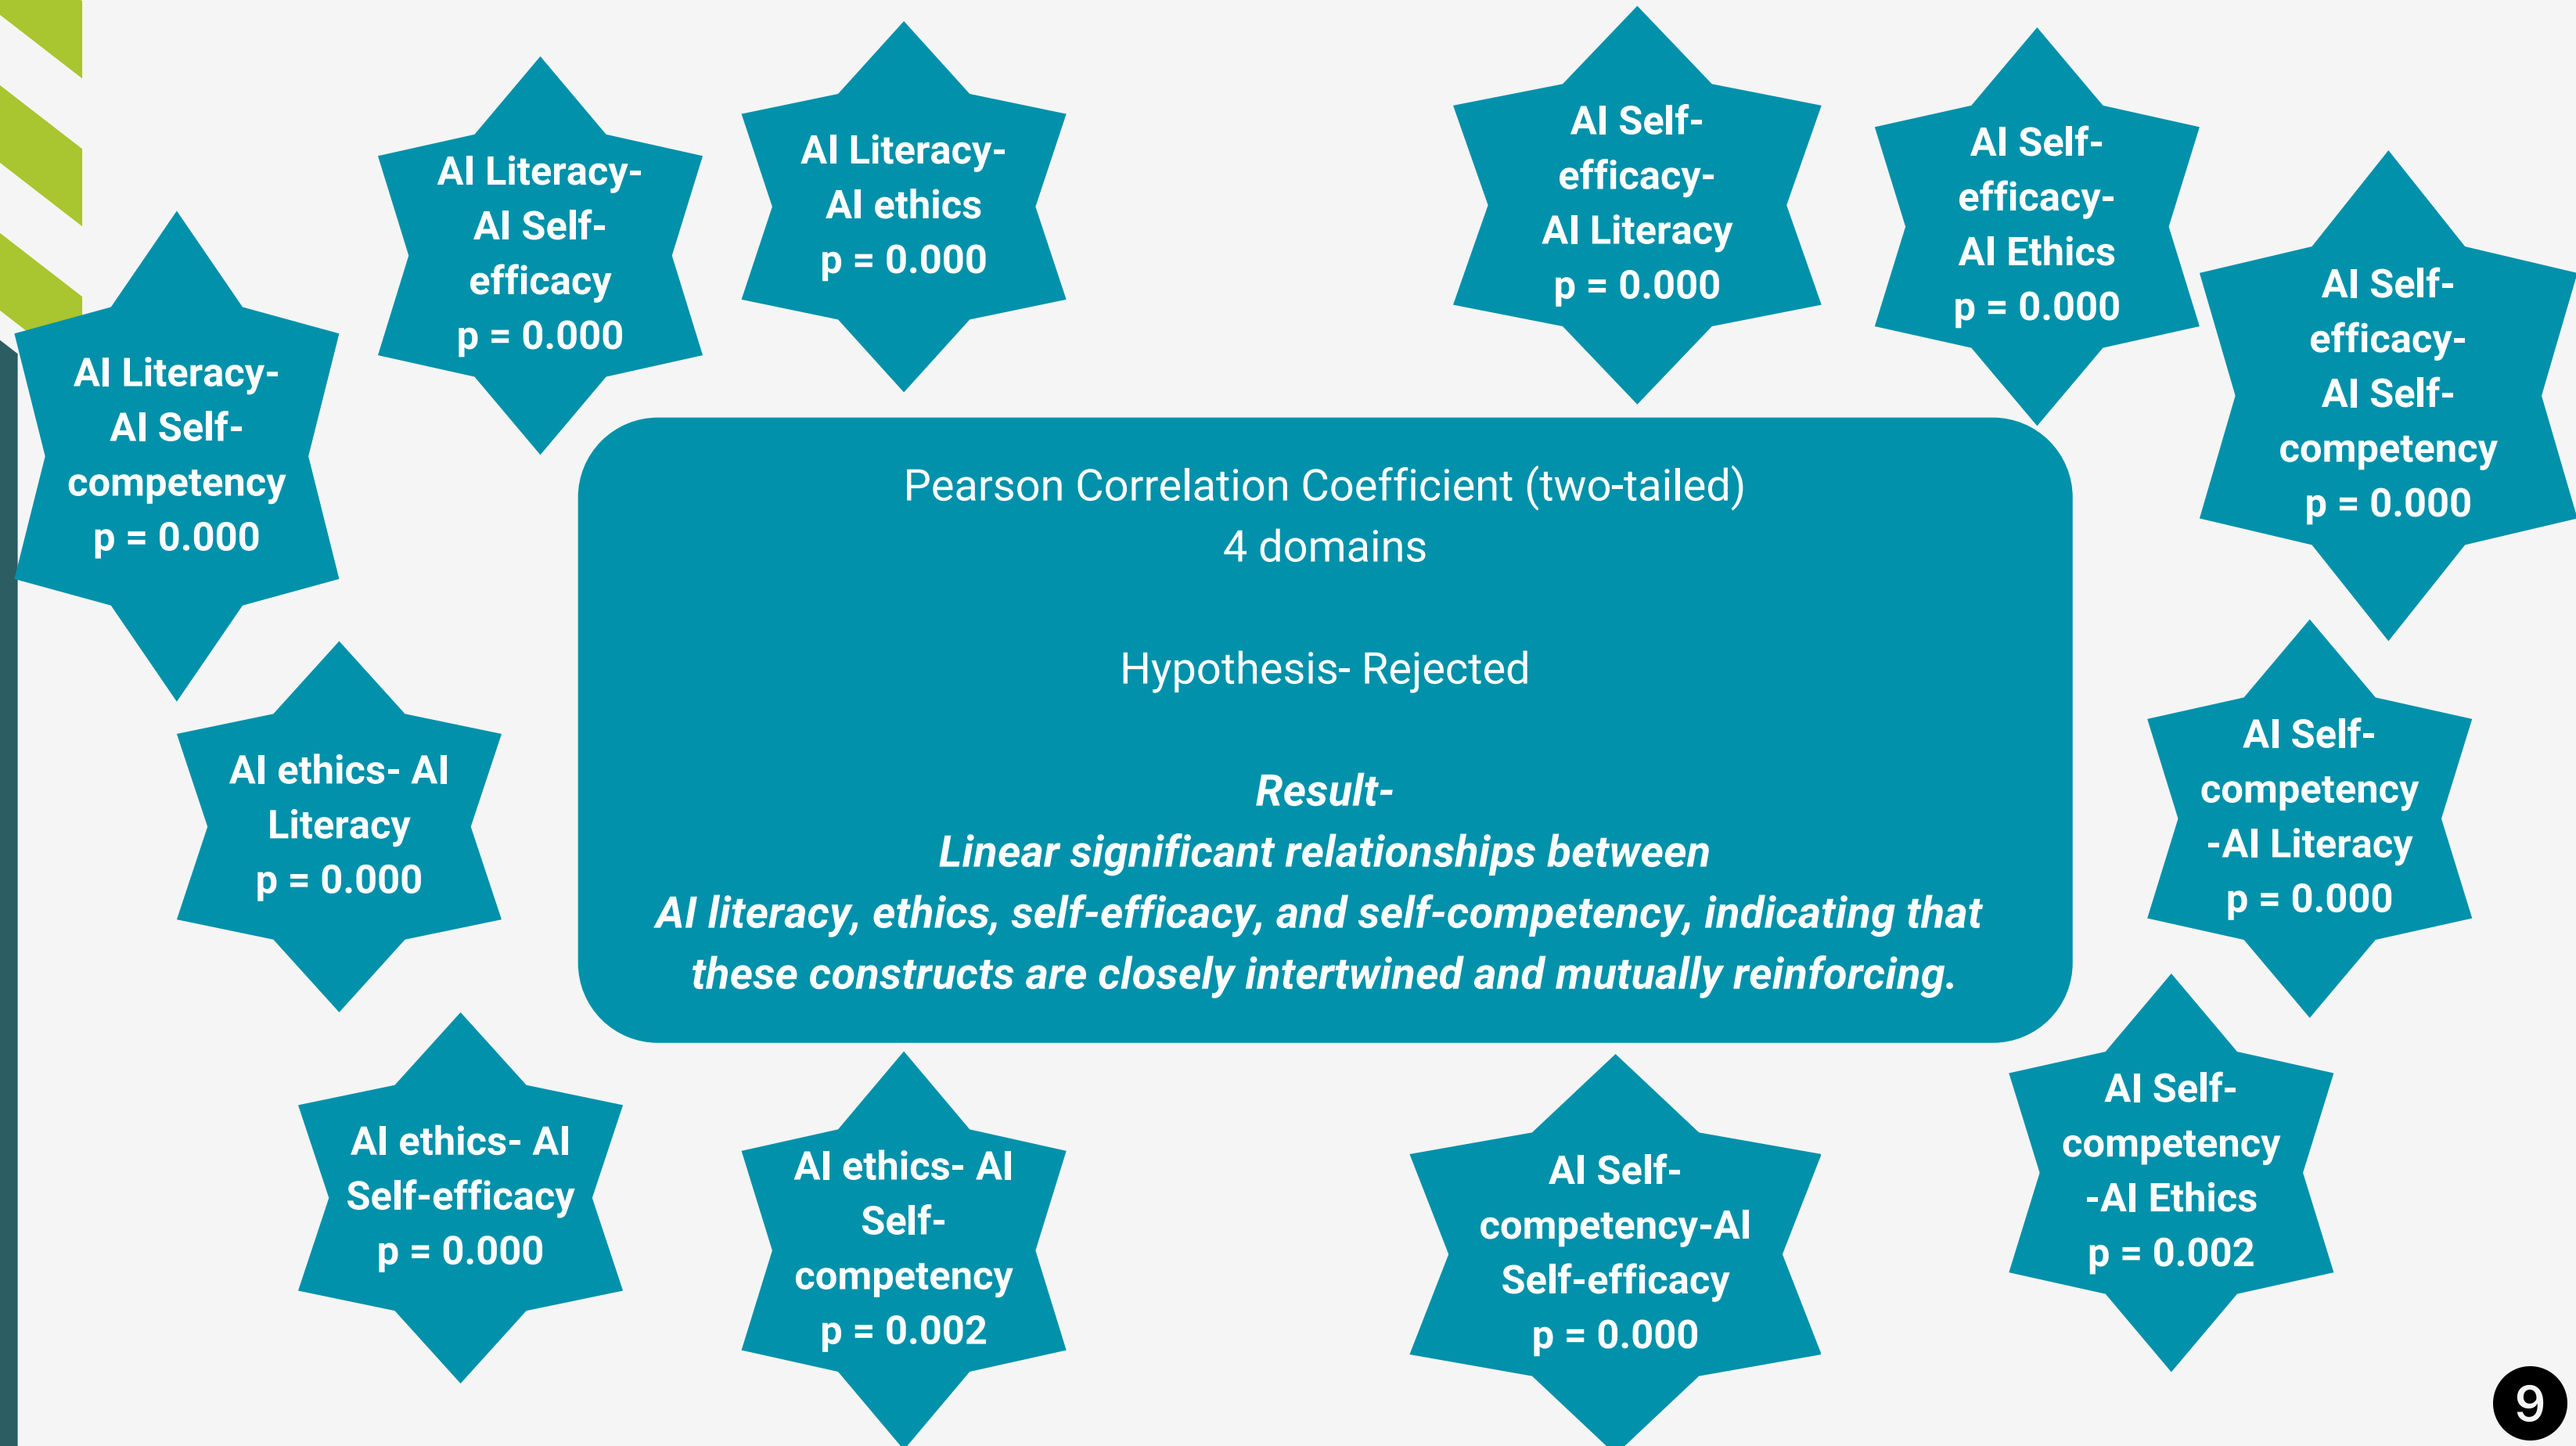

Hypothesis- Accepted

Result-

There is no difference between male and female college librarians' engagement with artificial intelligence in Assam ($p < .05$).

RESULTS

H3: Relationship between College Librarians' AI literacy, AI Ethics, AI self-efficacy, and AI self-competency in Assam.

DISCUSSION

College Librarian's Engagement with AI

1. AI Adoption by Librarians:

College librarians have actively embraced AI technologies, reflecting a positive shift towards technological innovation in academic libraries.

2. Ethical AI Use and Learning:

Librarians are enthusiastic about learning and adapting to AI while being mindful of ethical considerations.

3. Future Focus on Training and Collaboration:

To effectively utilize AI, librarians need ongoing training, collaboration, and knowledge-sharing networks as technology evolves.

Gender and College Librarians' Engagement with AI

1. No Significant Gender Influence:

Gender does not significantly affect college librarians' engagement with AI.

2. Other Influential Factors:

Educational background, professional experience, and institutional culture may play a larger role in shaping attitudes toward AI.

3. Ongoing Monitoring for Equity:

It remains important to monitor gender dynamics in AI adoption to ensure equal access and opportunities for all librarians.

Relationship between College Librarians' AI literacy, AI Ethics, AI self-efficacy, and AI self-competency

1. Positive Correlation Among AI Literacy, Ethics, and Self-Efficacy:

College librarians with higher AI literacy tend to have greater ethical awareness and self-efficacy in using AI tools.

2. Comprehensive AI Competency:

Higher AI literacy is linked to overall competency in navigating AI-related challenges.

3. Need for AI Education and Training:

The findings emphasize the importance of comprehensive AI education for librarians, covering technical skills, ethical considerations, and confidence in applying AI solutions.

LIMITATIONS AND FUTURE WORK

1. Study Limitations:

The study's sample was limited to college librarians in Assam, India, and did not use the full AI literacy questionnaire.

2. Future Research Focus:

Future studies should explore factors influencing AI adoption, gaps in AI-related skills, the impact of AI on library services and user experiences, and the ethical implications of AI in libraries.
